WELLBEING ECONOMY – A WAY TO SUSTAINABILITY IN THE HIV AND AIDS RESPONSE?

Friday 4th October 2019, 9 am - 4 pm
Helsinki Congress Paasitorni

International commitments have been made to put an end to HIV and Hepatitis epidemics. However, the EU and Europe more widely continue to face many challenges in terms of access to prevention and care, and respect of fundamental rights. Could a Wellbeing Economy give a way to achieve a sustainable response to HIV, AIDS and co-infection? Is it possible to achieve the fundamental goal of sustainable wellbeing with dignity and fairness for all humans?

This seminar is an official side event during Finland's Presidency of the Council of the EU.

The invitation and detailed program will be sent closer to the event.
